MUCH MORE THAN A FANCY GARDEN SHED

PRODUCT INFORMATION

BASE TYPE
LEKA XI GRP BASE SYSTEM

WALL CONSTRUCTION
LEKA XI GRP INSULATED WALL SYSTEM

ROOF TYPE
LEKA INSULATED FLAT ROOF SYSTEM

FENESTRATION
UPVC WINDOWS, FRENCH DOORS, ALUMINIUM BIFOLDS AND MUCH MORE....

A thermal garden building from Feel Warm is much more than a fancy Garden Shed. Our Garden rooms come as standard with thermal insulation you would expect to see on an extension making it a practical space as a Garden Office, Work Space or Relaxation Space all year round.

▼ **BASE AND WALL SPECIFICATION**

Our base system is called Leka Xi and is seated on concrete pads that go to a minimum depth of 600mm. The GRP base is assembled onsite and insulation panels are inserted into the base before applying an 18mm board to form the floor. Walls are installed using pre-fabricated structural panels which contain a thick insulation slab. Internal walls are boarded and skimmed and an external finish applied.

▼ **ROOF SPECIFICATION**

The Leka roof system is used to build a flat roof structure which can span up to 5 meters without additional support and contains 130mm of insulation. A vapour layer ensures warmth in the winter months and is certified to achieve a u-Value of 0.15. A firestone EPDM rubber roof is then installed providing high performance weather protection with an expected lifetime of 50 years.

PRODUCT OPTIONS

Sheerline lanterns are available in three standard powder coated colours, with the option of choosing a different colour for the interior.

01 ROOF LANTERN

Why not take your garden room to the next level with a Sheerline S1 aluminium roof lantern. Available in white, grey or black with a variety of glass options you won't be disappointed with what this elegant next generation roof lantern brings to your stylish garden room. Our roof lanterns will flood your building with light and also feature an integral LED light channel giving you an easy way to add mood lighting to add that last element of individuality to your interior.

02 EXTERNAL FINISH

We offer a choice of horizontal or vertical slated or panel composite cladding in a variety of colours. Composite panel cladding is a low-maintenance, highly durable alternative to traditional wooden boards. Available in a range of colours and styles, our composite panel cladding boards are ideal both for modern and traditional designs.

No maintenance Vertical or Horizontal composite clad panels available in a variety of colours.

03 GLAZING AND LIGHTING

We offer a variety of window, door and lighting solutions including highly performant UPVC window and door systems as well as elegant and sleek aluminium bifold doors and windows. External and Internal lighting can also be installed using high quality functional products that will compliment your Garden Rooms high specification interior and exterior finishes.

Bring your Garden Room to life with our stylish window and door options as well as external lighting.
